

# Protect your Unborn Baby

## How to wear a safety belt when you're pregnant

**DIAGONAL BELT**  
above the bump,  
between the breasts  
and over your shoulder  
(never under your arm)

**LAP BELT**  
as low as possible  
under your bump,  
across your thighs

**Buckle up for you and your baby. Have a safe trip!**
